CBORD Releases WaterMark™

Ithaca, New York—The CBORD Group, Inc., a worldwide provider of food and nutrition services software, is pleased to introduce WaterMark™, a new document creation tool for EventMaster PLUS!,™ CBORD's powerful event management software. WaterMark™ gives EventMaster PLUS!™ users the power to create fully customizable contracts, banquet event orders, and other letters complete with logos, boxes, and graphics. Users can now spell-check their documents, then fax or email them directly from the application. One of the first WaterMark™ users is Wolfgang Puck Fine Dining Restaurants in Las Vegas. They are thrilled with the product's performance.

"We were able to easily customize the program," said Kimberly Gora, Director of Catering for Wolfgang Puck Fine Dining Restaurants. "I like the convenience of having everything I need in one program."

WaterMark™ integrates CBORD's EventMaster PLUS!™ software and Microsoft® Word 2000 word processing software. This enables catering outfits like Gora's to benefit from the rich feature set of Microsoft® Word. "They'll never have to type another contract or confirmation letter by hand because WaterMark™ automates the entire thing," explained Matt Gray, Product Manager for EventMaster PLUS!™. "Catering customers each have their own special kind of BEO. Users can now create fully customized BEOs arranged in columns or quadrants, or however they want. The best part is that they can do all of this easily using a tool that they probably already know."

WaterMark™ is now available for CBORD's EventMaster PLUS!™
